

The Muscadine Grape Berry

Native to the southeastern United States, Muscadine Grapes (*Vitis rotundifolia*) aren't the grapes you typically see at the grocery store.

Long before the first European settlers stepped foot into the New World, the Muscadine grape was growing wild in the wooded areas of what would become known as the southeastern United States. These powerful little berries thrived in the harsh winters and blazing hot summers without the interference or aid of the outside world.

They are well noted for their thick skins and larger seeds, which are actually the two things that make these grapes so healthy. Much of the nutrition is in the skin, the thicker the better, and the powerful seeds.

Muscadine grapes have 2 more chromosomes than wine/table grapes. This provides a much greater genetic ability to help build your health. Unlike other fruits or berries, the Muscadine has the ability to resist mold, bacteria, and viruses without the use of harmful chemicals.

That is also why they grow so well in the hot, humid climate of the southeast. Due to their extra set of chromosomes, Muscadine grapes can flourish in locations where traditional grapes cannot.

What sets Mighty Muscadine® apart from other Muscadine manufacturers is the years of research and ongoing testing including conducting human clinical trials. Our investment into proving that we can better people's health and wellness through the science of the Muscadine is what we care about most.

Is it a grape or a berry? The Muscadine has so many chemical properties of both a grape and a berry, why not call it both? Technically it is called a grape...but according to the science...it is actually a berry.

Seed & Skin Supplement

Our Mighty Muscadine® Grape Supplement is made from exclusively sourced, premium Muscadine grape seeds and skins, containing concentrated, 100% naturally-occurring phenolic compounds, better known as antioxidants. Mighty Muscadine® Grape Seeds and Skins are rich in these antioxidants, including ellagic acid, resveratrol, quercetin, anthocyanins, flavonoids, Oligomeric Proanthocyanidin Complexes (OPCs) and many more, proven to better your overall health.

Each capsule contains only 100% pure and natural Muscadine seeds and skins. The recommended daily dosage is 3 to 6 capsules per day. Each bottle contains 60 vegan and gluten-free capsules.

The seeds and skins of the Muscadine grape have an overwhelming abundance and unique combination of antioxidants that help the body protect and repair cellular damage.

ORAC stands for Oxygen Radical Absorbance Capacity. It's a lab test that attempts to quantify the "total antioxidant capacity" (TAC) of a food. ORAC ratings may vary from batch to batch. All ORAC ratings are measured by Brunswick Laboratories, and expressed as micromole TE per 1 gram.

Seed & Skin Extract

Many nutritional products claim to be extracts when they may be a whole milled seed or skin. Mighty Muscadine® works with a team of scientists and doctors to give you a premium Muscadine Extract. We extract the antioxidants from the seeds and skins (without the use of alcohol), that is 10 times stronger than milled seed and skin. Each batch is individually tested and contains between 15,000 and 25,000 mg/L.

This unique combination of nutrients reduces oxidative stress,* boosts cardiovascular health,* increases blood flow,* improves brain function,* supports the immune system,* promotes joint health,* supports sexual health,* fights Inflammation,* and reduces premature aging*.
